**DETAILED ACTION**

Claims 4, 6, 8, 10, and 16-18 are pending and subject to restriction.

***Election/Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 4, 6 and 16-18, drawn to food composition comprising strains of *Lactobacillus* or a pharmaceutical composition comprising strains of *Lactobacillus*

Group II, claim(s) 8 and 10, drawn to a method of stimulating mucosal immunity in a human by administering a strain of *Lactobacillus*.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

No common inventive concept is shared among groups I and II, since a technical relationship is lacking among the claimed inventions involving one or more special technical features because *Lactobacillus* compositions in the form of food or beverage or pharmaceuticals are known in the art. See, e.g., Perdigon *et al.*, "Lactic Acid Bacteria and their Effect on the Immune System", Current Issues in Intestinal Microbiology, March 2001, 2(I), p. 27-42.

The requirement of unity of invention is not fulfilled because there is no technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" means those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Therefore, a technical relationship is lacking among the claimed inventions involving one or more special technical features.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Irene Marx whose telephone number is (571) 272-0919. The examiner can normally be reached on M-F (6:30-3:00).
